Advanced Math Pathways — Spring 2027

Do you want help with the math you are learning in school? Do you enjoy challenging yourself academically? Do you want to accelerate your learning of mathematics so that you are better positioned to pursue a career in mathematics, science, engineering, or technology?

School-aged students are invited to join our Advanced Math Pathways program. Students will learn to solve challenging problems, to explore interesting math concepts through hands-on activities, and to hone their basic math skills. We also provide tutoring support.

- Free and open to school-aged students
- To register, visit the web page at `https://riverbendmath.org/pathways/` or contact Amanda Serenevy
